Ayer's PHARTIO

From a Forwarding Merchant of St. Louis, Feb 4, DR. Aven: Your Pills are the paragon of all that is great in medicine. They have cured my little daughter of ulcrons sores upon her hands and feet that had proved incurable for years. Her mother has been long grievously afflicted with blotches and pimples on her skin and in her hair. After our child was cured, she also tried your Pills, and they have cured her. ASA MORGRIDGE.

have cured her. As a MORGRIDGE.

As a Family Physic.

From Dr. E. W. Cartwright, New Orleans.

Your Pills are the prince of purges. Their excellent qualities surpass any cathartic we possess, They are mild, but very certain and effectual in their action on the bowels, which makes them invaluable to us in the daily treatment of disease.

to us in the daily treatment of disease.

Meadache, Sick Meadache, Foul Stomach.

From Dr. Edward Boyd, Baltimore.

DÉAR BRO. AYER: I cannot answer you what complaints I have cured with your Pills better than to say all that we ever treat with a purgative medicine. I place great dependence on that effectual cathartic in my daily contest with disease, and believing, as I do, that your Pills afford us the best we have, I of course value them highly.

Persanua, Pa. May 1 1865.

dose or two or your They cleanse at once.
foul stomach, which they cleanse at once.
Yours with great respect, ED. W. PREBLE.
Clerk of Steamer Clario

Billous Disorders—Liver Complaints.

From Dr. Theodore Bell, of New ForkCity.
Not only are your Fills admirably adupted to their purpose as an aperient, but I find their beneficial effects upon the Liver very marked indeed. They have in my practice proved more effectual for the cure of bilous complaints than any one reinedy, I am mention: I sincerely rejoice that we have at le-gth a purgative which is worthy the confidence of hic profession and the people.

Department of the Interest of the Interest and hospital practice ever since you made them, and cannot hesitate to say they are the best cathartic we employ. Their regulating action on the liver is quick and decided, consequently they are an admirable remedy for derangements of that organ. Indeed, I have seldom found a case of bilious disease so obstinate that it did not readily yield to them. Fracternally yours, A LONZO BALLIA, M. Di.,

Physician of the Marine Hospital,

Dysentery, Diarrhene, Relax, Worms.

From Dr. J. G. Green, of Chicago.
Your Pills have had a long trial in my practice, and I hold them in esteem as one of the best aperints I have ever found. Their alterative effect upon le liver makes them an excellent remedy, when you in small doses for billious dysentery and discreage. Their supercoading makes they were age.

Dyspepsia, Impurity of the Blood.

Dyspepsia, Impurity of the Blood.

From Rev. J. V. Himes, Pastor of Advent Church,
Boxton.

Dr. Ayer: I have used your Pills with extraordinary success in my family and among those famcalled to visit in distress. To regulate the organs of
digestion and purify the blood, they are the yery
best remedy! I have ever known, and I can confdently recommend them to my friends.

Yours, J. V. HIMES,
Warsaw, Wyoming Co., N. Y., Oct. 24, 1885.

DEAR SIR: I am using your Cathartic Pills in my
protocost and in them an excellent purgative to
cleans the system and purify the Journains of the
blood.

JOHN G. MEACHAM, M. D

Constituation, Costiveness, Suppression,

Donn's MEACHAM, M. D.

Constipation, Costiveness, Suppression,
Rheumatian, Gont, Neuralgin, Bropsy,
Paralysis, Fits, etc.

From Dr. J. P. Vaughn, Montreal, Canada.

To much cannot be said of your Pills for the
common suppression of the said of your Pills for the
common suppression of the said of the multituder
found them as utleadous as I have, they should Join
metal probleming if, for the benefit of the multituder
who suffer from that complaint, which, although
had enough in itself, is the progenitor of others that
are worse. I believe costiveness to originate in the
liver, but your Pills affect that organ and cure the
disease.

From Mrs. E. Stuart, Physician and Midwife, stomach and also very effectual to cleanse the stomach and expel worms. They are so much the best physic we have that I recommend no other to my patients. From the Rev. Dr. Hawkes, of the Methodist Epis. Church.

Church.
Church.
PULASKI HOUSE, SAVENIMB, Ga., Jan. 6, 1856.
HONOIRED SHR: I should be ungrateful for the relief your skill has brought me if I did not report my case to you. A cold settled in my limbs and brought on exercisting neuralgic pains, which ended in chronic rheumatism. Notwithstanding I had the best of physicians, the disease grew worse and worse, until by the advice of your excellent agent in Bultimore, Dr. Mackenzie, I Trefe Your Fills. Their effects were slow, but sure. By persevering in the use of them, I am now entirely well.
SENATE CHANNER, Baton Rouge, La., 5 Dec., 1865.
DR. AYER: I have been entirely cured, by your Pills, of thleumatic Gout—a painful disease that has afflicted me for years. VINCENT SLIDELL.

The Most of the Pills in market contain Mercury which although a vallable remedy in skifful hands, is dangerous in a public pil, from the draadful consequences that frequently follow its incattious use.

These contain no mercury or mineral substance whitever.

Price, 25 cents per Box, or 5 Boxes for \$1. Prepared by Dr. J. C. AYER & Co., Lowell, Mass.

EXTRAORDINARY CURE OF A COUGH

"Nightingale Hall, Edmonton.

"Dear Sir,—I have recently suffered much from a most violent cough, proceedid,; from a tickling in my chest, which no remedy, out of many I resorted to, could allay. My head was constantly ashing; and my whole frame entirely shaken thaving seeh the good effects of your Ealsam of Aniseed in several members of my family. I purchased a small bottle, and, when going to bed at hight took a teaspoonful in two tablespoonful of water, just warin. The effect was immediate; it arrested the tickling in my chest, I slept well, and arose perfectly restored in the morning, with the exception of debility, arising from fatigue by incessant coughing for some days previous. My cough entirely left me, and has never returned Having since heard of a lady in the neighborhood who for a long time had laboured under a most discessing cough, and who had resorted to overy "Nightingale Hall, Edmonton medicine, feeling as I do fully

assured of its efficacy,
"I am, dear Sir, yours very truly,
"WM. BOARDS. "To Mr. Thos. Powell."

POWELL'S BALSAM OF ANISEED For Coughs, Colds, Influenza, Shortness of Breath, Ashma, Bronchitis, and for all affec-tions of the Lungs, this old established remedy will be found invaluable.

The large sales and increased demand for this excellent and elegant preparation, which has followed its introduction into Australia, New Zealand and nearly ill the British Colonies, has induced the Proprietor to still further extend the beneficial results of its use; and he begs to announce that he is now introducing its sale into Victoria, B. C. and has appointed Messrs Millard and Beedy, Whafr Street, Victoria, Whotesale Agents, through whom Chemists and Statespeepers can obtain their supply.

The Price is within the means of all classes.

Mere common humanity dictates that the temporary illness of a public officer should not be seized upon as a pretext to urge his retirement, or to taunt him with the non-fulfilment of duties pertaining to the position he holds; but when it is a matter of notoriety that the incumbent of an office has become so invalided that the medical skill the Colory has been exhausted in his behalf without effect, and that an entire withdrawal from the cares of business and a return to England are necessary to restore him to healththere is surely no inhumanity in allowing our knowledge of the inconveniences and losses resulting from the non-performance of the duties to be made public, and in advising an instant severance of the tie which binds the officer to the Colony. Throwing aside, then, considerations of a delicate nature, and looking at the case entirely as it affects the public weal, we are forced to say that the official who retains a position after he has become incapacitated through illness or any other cause for the proper discharge of its functions, is acting in ill faith with the Government from which he derives his appointment and the people whose interests he was selected to guard For some time it has been understood that a high official is prevented from attending to his duties in consequence of a severe attack of illness which it is said can only be combatted by a change of climate; and the fact that the public interests are suffering in a most serious and alarming manuer in consequence is patent to all. Deputations have been unable to obtain an audience; memorials on important subjects have remained unnoticed; and the most trivial as well as the most important communications have failed te draw forth even an acknowledgment. Under such a state of things, (we say it in all kindness), the continuance of the gentleman is his position would be perilous to his health and in the highest degree prejudicial to the best interests of the Colony. There are times when the country expects its officers as well as its citizens to lay down their lives in its service, but the exigency does not exist now, and no feeling, save that of a mistaken sense of duty, will palliate or excuse a further retention of the office under

circumstances so distressing on the one hand and so disastrous on the other. The recent invention of the application of vulcanized India rubber to the tires of road stcamers, is not without interest to this section. Occasionally, for years back, a project has been mooted for the construction of a tramway from Nanaimo to Esquimalt, so that sea-going vessels might avoid the intricate navigation between those two ports, and save the additional premium paid for insurance and the charges for pilotage. In the northern part of New York State, a few months ago, we passed over a thirty-mile tramway of locust-wood, which had been in u-e for the general purposes as a railroad several years, and hardly bore evidence of wear. The speed attained was about fifteen miles with locomotives The cost of the road was but \$7000 a mile; and its success bad induced the citizens of some localities in that State and Canada to take stock in compan. ies formed to lay down wooden rails for the facilitation of traffic between certain interior cities. It is probable, however, that the improved roadsteamers will obviate the necessity for rails, and that the great problem of running locometives with loaded cars attached over ordinary roads without injury either to the engine or the thorn oughfare, has at last been solved; in which case even wooden rails may be discarded, and rapid land communication by steam with Nanaimo and other points secured without the necessity of a tramway. Experiments recently made in Scotland with the India rubber tire have been attended with most satisfactory results, and it is not doubted that within a few months steam traction engines will be running successfully upon every road throughout the United Kingdom, and even over the streets of crowded cities; In a late number of the Scotsman we find a report of one of these experiments, which we commend to the careful attention of the Government and our business men:

A train of heavily laden coal wagons, looking exactly like a luggage train, was observed coming steadily up the steep incline leading into Edinburgh from Dalkeith. It was one of R W Thomson's patent road

teamers, with India rubber wheel tires, have steamers, with India rubber wheel tres, lasing four huge loaded wagons in tow. Each
wagon weighed when empty two and threequarter tons, and carried a load of five and
one-quarter tons of coals, making the grows
weight of the wagons 33 tons. The road
steamer weighs eight tons. Thus a total of
40 tons was in motion. The road steamer
had drawn the train from Newbattle collierter state waster maker. ies eight miles from Edinburg, over a very billy road, with rising gradients of one in

The hill from Pow Burn up to Minto street is both long and steep, but the road steamer drew its train to the top with the most perfect ease. It was very curious to watch the behavior of the patent India rubber tires of the road steamer as they passed over the various descriptions of road surface. In the outskirts of the city where the roads are macadamized, there were many places where broken stones had just been spread on the surface. Over these sharp loose stones the India rubber tires of the road steamer passed without crushing, or in fact disturbing them in the least. The roughest and charpest bed of broken stones sank gently into the elastic cushien of India rubber, which rose from the contact with the most jagged fragments of stone without any trace or marie of injury. The hill from Pow Burn up to Minto street contact with the most jagged tragments of stone without any trace or mark of injury. The prefect command which the conductors of the train bac over its movements coubled them to coutrol both its course and speed with the utmost precision. The line of streets through which it passed are always the most crowded streets in the city, but noth withstanding all these obstacles, aggravated by the streets being at some points under repair and closed for one-ball their width, no difficulty was experienced in steering clear of every impediment.

every impediment.

The extremely curious way in which the whole four wagons follow snake-like in the track of the road steamer, was clearly seen in passing out of North Bridge into Leith street. First the road steamer had to turn to the right, and before the last wagon was around the corner to the right, the road steamer bac already turned sharp to the left to go into Leith street. Thus the train actually assumed the form of the letter S, every wag n going over the same ground as the road steamer with the most perfect accuracy. The Iroid Rubber tires, interposing a soft and clastic cushion between the two, effect. ualy protect them both from every jar and joit—in fact as much so as if the engine were traveling over a tramway of India rub

Editorial Correspondence-No. 24.

TORONTO, ONTARIO, Sept. 1, 1868.

I regret that the time still at my disposal will allow me to torry but a few hours in this, the capital city of the province of Ontario and the metropolis of the most fertile and populous section of the New Dominion. I reached this point after a ride of sixteen hours from Montreal over the Grand Trunk Railway, but am able to give only a very incomplete description of the journey and he section in which I find myself. The line of road by which I came hither runs through a country mostly flat and uninteresting and exhibiting but little of the spirit of enterprise or improvement. Many of the towns, too, through or past which we were whirled do not appear to enjoy a very great measure of prosperity, and few signs of improvement were observed until we reached a point some 60 miles east of Toronto, where the character of the country gradually changes, the soil becomes more favorable, the farms more numerous and the towns larger, 'amarter' and thriftier in appearance. These points of difference are attributable in a great measure to the severity of the winter in the section that borders on the St Lawrence river, and the less fertile character of its soil. The country bordering on Lake Ontario enjoys a more temperate climate and the character of the soil is better fitted to reward the labor of manthan that of Lower Canada I have seen nowhere richer soil, finer farms or thriftier people than are to be found in Toronto is a modern built this section. city of 60,000 inhabitants. The buildings are mostly of brick, the streets wide and running at right angles-points of difference between this city and Montreal, where most of the buildings are of granite and the thoroughfares with few exceptions as crooked as rams' horns. What Notre Dame street is to Montreal, King street is to Toronto-its principal business theroughfare, whereon are situated the finest stores in which the heaviest retail trade is transacted. The wholesale business of Toronto is large and increasing with a rapidity unexampled elsewhere in the Dominion save at Montreal. where, as I have stated in a previous letter, the growth in the past few years has been marvellous. Twelve years ago the bulk of the goods required for West Canadian consumption were purchased by Toronto merchants at Montreal from importers there but of late years the former have opened commercial relations with England, and now nearly every prosperous merchant of this oity is an importe. Canada West, it must also be remembered, has of late years entered largely into the manufacture of many articles which were formerly imported from the Old Country, and for these articles Toronto furnishes the best and surest market, just as Montreal furnishes the best market for articles of Lower Canadian production. Notwithstanding the abrogation of the Reciprocity Treaty the value of the importe and exports of the Provinces have largely augmented since 1866. About the only perceptible effect of the abrogation of the Treaty has been the transfer of Canadian trade from New York and Boston to London and Liverpool. The exports to the United States of articles of Canadian production are now larger than ever before, and stimulated by being thrown upon their own resources The Canadians have snatched from the grasp of the New Yorkers a very large share of the trade their port formerly enjoyed with the West Indies-the excellence and cheapness of Canadian manufactures giving them preeminence over American goods. The ous oms tariff (average) of British Columbia (if I remember correctly) is 20 per cent.

\$1 a day in silver? Those who have worked in both countries unhesitatingly give the hard money country the preference. The public buildings of Toronto are numer ons and handsome. The University, Normal School, Trinity and Upper Canada Colleges, Mechanic's, Masonic and St Lawrence Halls, are all imposing structures, but their internal arrangements and decorations must remain for the present a 'sealed book' to me, as I have not the time at my disposa

while that of the Dominion is bu

cent. Labor is nearly as well paid here as

in the States, when we bring greenback

prices down to a gold basis. You read

that laborers get \$2 in the Northern States

and only \$1 in Canada; but please remember

that greenbacks are worth but 70 cents or

the dollar, that the price of every necessary

is double what it is here, across the line

(flour, worth to-day only \$6 in San Francis

co sells readily for \$12 in gold in New York

and taxation so heavy as to be almos

unbearable, and tell me how much better of

is the American who receives \$2 per day

in greenbacks than the Canadian who earns

to attempt even a cursory inspection. I have spoken of Montreal as a cheap market to which resort thousands of Americans yearly to replenish their wordrobes; but I find goods at least 10 per cent lower here than at Montreal. I do not speak particularly of Canadian manufactures. I mean imported goods as well, but for some reason which I cannot divine, the difference is not perceptible to visitors from the States, most of whom pass through Toronto and buy in

Montreal. The hotels of Canada are nothing to boast of. St Lawrence Hall, the 'crack' hotel of Montreal, charges \$3 per day in silver and to Burnard's Inlet to load with lumber.

the board will not compare with that provided for the same money at San Francisco, The charges at Toronto are \$2 50 in silver per day, and the board much inferior even to that at Montreal. The charges at the Russell House, Ottawa, are \$2 50 per day. With labor and food so much lower than in San Francisco, it is a puzzle to me how the Bonifeces of that goodly city can afford to farnish better bills of fare and better room accommodations than those of Canada for about the same rates.

The political feeling is favorable to the continuance of the Macdonald Ministry, and the earnest desire of all is to extend the limits of the Confederacy to the Pacific at the earliest possible moment. The fanatical effort of Wilkins, the Attorney-General of Nova Scotia over the Repeal Resolutions, and his threats to appeal to a 'foreign country' for aid, is looked upon here as Buncombe; but the question that most naturally occurs to men's minds is, whether an officer entertaining such sentiments should be allowed to remain a moment longer in the service of Her Majesty without a distinct disayowal upon his part of treasonable intentions.

Editorial Correspondence-No. 25.

HAMILTON, ONTARIO, Sept 2d, 1868. A ride of two hours in the cars brought me from Toronto to this city, which is situated at the head of Lake Ontario, and contains some 22,000 inhabitants and many handsome private and public buildings. The line of road runs through a magnificent country in a high state of cultivation. In fact, the couatry is a 'garden' for richness of soil and productions, as far as the eye can reach. Here I find our whilom friend and fellows townsman, Rev Dr Evans, of the Wesleyan Methodist Church, and his family, all in the enjoyment of health and happiness. The reverend gentleman is settled over a large and influential congregation in this city-a congregation over which, by the way, he was pastor twenty-seven years ago, at a time when he was in the full vigor of manbood and when the large and flourishing city see around me was in its swaddling clothes It must be a source of sincere gratification to the doctor, after years of toil in a distant land, to be welcomed gladly back by the descendants of the men and women over whose spiritual welfare more than a quarter of a century ago he faithfully watched. It occurs to me that than this no more gratifying evidence of the popular appreciation of

a good man could be given. Hamilton lies on the main line of the Great Western Railway, and is the terminus of some of the branch lines of the company. The cars at this line are far superior to those of any other I have yet traveled over. How strange, that away in Western Canada I should find railway accommodations superior to those on any of the many lines running out of the great American metropolis, and compared with which the latter bear about the same relation as the kitchen of a house to its parlor. Near this point some ten years ago a bridge broke down beneath the weight of a train of cars, driven at full speed by an inexperienced engineer, and forty lives were lost. Since that period few accidents have occurred, owing to the precantions im-

osed by law upon the employes. Hamilton contains several hotels, where accommodations (good for Canada) may be obtained; but as I have previously stated none of the hotels at which I have 'put up' surpass and few equal the hotels of San Francisco.

MECHANICS' INSTITUTE -The annual meeting of this excellent institution took place on Tuesday night, and was numerously and respectably attended, Dr Ash, President, presiding. The report of the Secretary, Mr Alsop, presented a most gratifying prosperity which cannot be regarded otherwise than creditable to the city. The total receiots for the current year, ending 31st Oct., were \$2078 97, leaving in the hands of the Treasurer, after paying all indebtedness, the sum of \$22 21, in addition to \$266 sent to England for the purchase of new works which may be expected out by the next vessel. There have been 230 volumes presented to the Institution during the past year, and 94 purchased, making the total number of volumes at present in the librar. 2067. The increase to permanent subscribers is 14. The Secretary in his report congratulated the members upon the institution being out of debt, and the solid prospect before it of prosperity and extended usefulness. The following is the list of officers for the ensuing year: Mr Lumley Franklin, President; Mr James Fell, Vice-President; Mr Alsop, Treasurer; Legh Harnett, Secretary; Mossrs Fox, Macdonald, Alston, Page, Tozo, Farden, Ross, Redfern and Gray, Managing Committee. After the public business was transacted, a handsome cold collation was set out in the Library and under the able management of the .President and Vice-President, the members spent the remainder of the evening most agreeably

In anticipation of the changes shortly to take place across the Sound, farming land there has advanced materially in the past lew months. The Americans appoint to be ust awakening to au appreciation of the boundless resources of Paget Sound, and the value of the poble sheet of water and its fine harbors to commerce. Suppose (Heaven forbid a realization of the supposition!) San Francisco, depopulated by the frequency and intensity of the disturbances of terra firma, Puget Sound, from its position and natural advantages, must instantly rise to a position of great wealth and importance. But in any event, the prosperity and growth of Puget Sound are assured.

FOR THE MAINLAND .- The steamer Enterprise, owing to the strong wind, did not leave for New Winstminster until this morning. She took up a large freight for the interior.

THE BOLIVIA .- This ship will finish discharging her cargo by the lend of the present week, and then proceed as already aumounced

ST. JOHN'S SCHOOL HOUSE .- This handsome structure is being rapidly progressed with and would be still further advanced but for the difficulty of obtaining plasterers. From the success of the last concert given by the St John's Choral Society, we are pleased to learn, the School House will be opened by a concert of sacred and secular music, the proceeds of which will be devoted to the building fund. The concert is in course of preparation, and promises to be as satisfactory as the former. It will probably be given within a month.

THE GYMNASIUM .- At a meeting of this Society vesterday it was determined to remove their building from its present position to the vacant lot at the corner of Yates and Broad streets, as soon as funds can be raised to defray the expense. For this purpose the committee have determined to issue life memberships at \$20 each, in addition to other

Correction .- By an error in the punctuation of Mr Bishop's letter vesterday morning, the offer made to the charterers by Cept Morton was obscurely stated-the sentence should have read as follows: "The other accounts were for supplies; of these the Captain admitted, all but about \$200, and offered to pay the amount he admitted—this the charterers refused."

HONOBABLE .- R Stege, formerly of Big Bend, has recently sent a considerable sum of money from San Francisco towards the liquidation of certain debts he left behind him. The money was placed in the hands of Mr Bushby, of New Westminster, and has been distributed among the creditors of Mr Stege according to instructions.

SUDDEN DEATH,-A Frenchman residing near the Telegraph Hotel on Store street, where he vended fruit, died yesterday morning suddenly. His symptoms were similar to those usually resulting from the effects of poison, and it is probable an inquest will be

DISTRICT ELECTION .- No positive information has been received respecting the result of yesterday's election. All that could be ascertained, was that shortly before the close of the polls, Mr Green had only some half dozen votes at the Victoria District School House. Dr Davie was doubtless selected.

THE PORTLAND ROUTE.-The steamship Active will positively leave (so the advertisement reade), on Friday at 7 a, m. The G S Wright left yesterday for Nanaimo to load with coal, we believe, for Portland. It is annonneed that the Active will connect with the J L S.ephens in Columbia River.

THE DEL NORTE.—The steamer Emma returned yesterday from the wrenk. So far as could be seen, the gale from the south-east had not disturbed the Del Norte when Capt Ella left.

DURING the past summer the North channel through Columbia River has been filled and vessels now enter and leave the River by the South channel.

ST. ANDREW'S SOCIETY .- This Society met at the St. George Hotel on Tuesday night. The election of officers was postponed until the evening of 17th inst.

COUNTY COURT .- This Court will sit again this morning, at 11 o'clock, for the disposal of such cases as remain on the docket.

Down .- The wires have been down for two days in the Porcine (Swine-imish) district.

OVERLAND RAILWAY .- There are 15,000 men employed in the construction of the Overland Railway. It is encouraging to those who are in constant communication with the Eastern Markets to know of such an early prospect of greater future dispatch. Had this line been completed three months since, we should have been able before this date, respectfully to call the attention of the public to the great variety of Styles, and the Choice Patterns of the best Sheffield Pocket Cutlery, Scissors, &c., ex 'Bolivia.'-T. N HIFBEN & Co.

Rebellion in the Human Interior.

Rebellions are cot confined to bodies politio. They break out in our own interiors as well as in the "bowels of the land." The natural law of our bodies is health, but we misuse them and they revolt. We subject them to exposure, we overtask the stomach, we neglect the bowels, we plunge out of rooms hotter than the tropics into an atmosphere below freezing point, and in various other ways trifle with our health.

But these frames of ours are wonderful machines, and we can, by the use of the PROPER MEANS, so INVIGORATE and REGULATE them as to render them almost proof against the ordeals to which, in our recklessness, we subject them.

Nothing that has ever been known or heard of as a tonic adds so much to the resistant power of the human system under circumstances unfavorable to health as HOSTEPTER'S STOMACH BITTERS. If you would escape the intermittent fevers fits of indigestion, bilious attacks, and bowel nis of indigestion, bilious attacks, and bowel complaints, of which cold and damp are, the frequent cause, use the BITTERS as a PROTECTIVE MEDICINE. This is the wisest course; but if already an invalidity the preparation as a RESTORATIVE In either case full reliance may be placed upon its efficacy. Sold everywhere.—Sun day Mercury, Dec. 25th, 1862.

HODLWAY'S OINTMENT AND PILLS.—Notable Facts.—Intense heat augments the annoyances of skin disease and encourages the devel piment of fobrile disorder; wherefore they should, as they can, be removed by these detergent and purifying preparations. In stomach complaints, liver affections, pains and spasms of the bowels, Holloway's unguent well rubbed over the affected part immediately gives the greatest ease, prevents congestion and inflammation, checks the threatening diarrhosa and averts incipient cholera. The poorer inhabitants of large cities will find these remedies to be their best friend when a pestilence rages, or when from unknown causes eruptions. boils, spacesses, or ulcerations point out the presence of taints or impurities within the system, and call for instant and effective curative medcines. HOLLWAY'S CINTMENT AND PILLS .- Notable

MULTITUDES OF PEOPLE REQUIRE AN AL-CERATIVE, to restore the healthy action of their systems and correct the derangements that creep into it, Sarsaparillas were used and valued, several impositions were palmed off upon the public under this name. Ayer's SARSAPARILLA is no imposition.

Letter from Comox.

EDITOR BRITISH COLONIST :- The Yale Convention has truly said that the Government is a despotism. But why should scorn and mockery of our rights be added to the other acts of injustice which we have hitherto borne with patience? The people of Comox are law-abiding and loyal, but there is a limit to even their powers of endurance, and the insulting manner in which they are treated by those in authority tends to foster a spirit of dissatisfaction which will culminate in an active and spirited resistance to the Government. Our most recent wrong is the attempt to force upon us, as our representative, Mr David Babington Ring, a gentleman who may be an able lawyer, and a good judge of wine, but from whose political opinions we decidedly differ, and whose former political career, while member for Nanaimo, was not such as to recommend him to this constituency. Hitherto this district has had no voice in the Government of the country, and the first intimation that we were to be honored with the franchise we had on the 3rd inst, from Mr C K Price, who published handbills stating that the Stipendiary Magistrate would receive votes on the 5th for a member for the district in conjunction with Nanaimo, without stating what were the qualifications of electors, or who were the candidates, and when questioned, could give no other information. This was followed by an intimation that Mr Ring was to stand, and that there was no other candidate in the field. This took us by surprise. We had formerly wished to have a reprecentative to attend to our interests, but the shortness of notice and the distance and want of communication with Victoria, totally precluded us from taking the requisite steps to nominate a fit and proper man. But we expected Mr Ring and an opponent on the steamer; neither appeared. Mr Ring, however, in a private letter to Mr Price, solicited is services in explaining his views to the electors. He did this at a meeting on the 6th, at which a considerable number of the settlers attended. But we saw no necessity for voting for a solitary candidate, who sent us no address, and whom we could not question concerning the policy he would advocate One individual alone availed himself of the glorious privilege of voting for a man who can be rejected at the will of an incapable Governor. Let it be recorded that James Thompson voted for D B Ring, giving as his reason, Because, shure, he's an Irishman! But the others considered the whole affair a mockery of Representative Institutions and refused to vote, as the man we want is one who will steadfastly oppose the present irres sponsible and extravagant Government. Advocate Retrenchment, Reciprocity/ Confeder ration, and the immediate introduction of Representative Institutions. Then we might expect some little attention to our local necessities, such as Regular Steamboat Com munication and Roads and Bridges for which we have hitherto not received one cent. Mr Fell being here on business, delivered

an oration in Alexander's Hotel, endeavoring to convince us that the Colony was utterly unfit for Representative Institutions, extolling the Free Port, opposing Confederation, and maintaining that Victoria is British Columbia. But we know how powerful self-interest is, and he failed in his object.

Mr Editor, what is your opinion of the manner in which we are treated? Assist us in the application for and the maintenance of our just rights. Fearlessly advocate Reform And although the enemies of Freedom abuse you, you will earn the approbation of the wise and good, and the gratitude of the electors of Comox.

ROBERT C. COLEMAN.

The "Runaway Ship."

EDITOR BRITISH COLONIST :- A letter from Mr Robert Bishop appeared in your pape of yesterday, wherein he styles himself Solicitor for the Captain, ignoring Messrs Drake, Jackson & Aikman, who also acted conjointly with Mr Bishop for the Captain. The letter is a tissue of misstatements from beginning to end, and whoever furnished the item in your issue of the day before yester. day had a full appreciation of the conduct of a Captain who bolted away in debt for the cargo and without signing bills of lading. Mr Bishop evidently wants to create sympathy for his dear persecuted olient, the ranaway Captain, because Mr Bishop is fully aware that steps are about to be taken against parties to recover the just and honest claim of the persons who furnished the cargo and necessaries.

When the natter comes up, and is fully discussed before the Chief Justice, it will then be quite time for Mr Bishop to launch into print and vindicate the character of his client. Perhaps Mr Bishop will not then be quite so glad as he states he is at the success of the skeddadling Captain.

What bosh for Mr Bishop to call the procedings harsh! But never mind; the letter must have been written after 12 o'clock noon. JUSTICE.

A NEW DISCOVERY.—A French chemist has lound a way to illuminate the interior of people. He lowers a lantern into their stomachs, and then standing on the outside (we are assured he does not descend with the lantern), he can see distinctly the whole inside workings of the human form divine. It is said to be a very pleasant experiment for the patient. We doubt very much, however, whether it can ever be brought into general practice. Few persons are willing to have others know how they live. It is said to be so easy of application that the patient need not know when it is being done.

THE police regulations in Warsaw are very severe. Any person suspected of havng spoken Polish is sent to prison. Mourn
ing dresses have been forbidden for some
time, but now the interdiction extends to
gray and other colors. Policemen are stationed at the church doors in order to assure
themselves that the ladies do not level wear
skirts of the forbidden colors.

LORD STANLEY on leaving Paris recently is reported to have told M: de Moustier 'that England would go to war if necessary to maintain peace,

Comox, 6th Nov. 1868.

THE populations in Russia are greatly excited by the preaching of an old Muscovite peasant named Alexis Alexandrovitch, who, after a seclusion of several years, appeared in the district of Samara, declaring himself a prophet. He is now going from place to place announcing the approaching destruction of the Greach Cross for it on the demand Cross for it on the demand of St. the Greek Cross for it on the deme of St Sophia at Constantinople. The Russian Government allows every liberty of action and language to this popular agitator, who besides does not attack the laws or the administration in any way. His doctrines are those of the old Russian party.

THE retinue of Queen Victoria, thirty pernumber, partook of breakfast on passing through Basle. The meal was very frugal consisting only of cold meat, bread, butter and coffee; but the bill came to \$140 in gold, or \$4 66 each. Surely royalty must be highly valued out there.

THE milkmen of Gloucester, England, recently held a meeting for the purpose of rais-ing the price of milk owing to the drought, as they put it, but literally on account on the scarcity of water!

ADDING the inhabitants of the countries of ate annexed in Central Asia, the Russian Empire has now a population of nearly eighty millions.

HOSTETTER'S

CELEBRATED STOMACH BITTERS!

A PURE AND POWERFUL TONIC CORRECTIVE AND ALTERATIVE

Of Wonderful Efficacy in Diseases OF THE STOMACH, LIVER AND BOWELS.

PROTECTIVE PROPERTIES. Prevents Fever and Ague and Billious Remittent Fevers

Fortifies the System against Masma and the evil effects of unwholesome water; invigorates the organs of digestion and the bowels; Stendles the Neeves and Tends to Prola Life.

REMEDIAL PROPERTIES.

Cures Dyspepsia, Liver Complaint, Sick and Nervon Headache, General Debility, Nervousness, Depres-sion of Spirits, Constipation, Colic, Intermit-tent Fevers, Sea Sickness, Cramps and Spasms, and all complaints of either

sex arising from Bodily Weak-nesses, whether inherent in the system or PRODUCED BY SPECIAL CAUSES.

As a zenuine Tonic, HOSTETTER'S BITTERS produce effects which must be experienced or witnessed before hey can be fully appreciated. Persons of feeble habit, liable to Nervous Attaks,

Cowess of Issue and Fits of Larguor, find prompt and permanent relief from the Bitters. The testimony on this point is most conclusive, and from both saxes.

In districts infested with Feyer and Ague, it has been found infallible as a preventive and irresistible as a remedy. Thousands who resort to it if under apprehen-sion of an attack, escape the scourge; and thousand who neglect to avail themselves of its protective ties in advance, are cured by a very brief course

Acting as a gentle and painless aperient, as well as apon the liver, it also invariably relieve the Constipa ion superinduced by irregular action of the digestive and secretive organs
